OBJECTIVE

Results-driven Software Engineering student with strong foundations in systems programming, backend development, and software architecture. Experienced in building Unix-based applications in C with a focus on process control, memory management, and secure system behavior.

Skilled in multiple programming languages and modern development tools, with hands-on experience in REST APIs, database integration, and scalable software design. Passionate about leveraging technology to support IT auditing, digital transformation, and data-driven decision making in complex business environments.

SKILLS AND ABILITIES

Core Competencies

- **Programming Languages:** C, C++, C#, Java, JavaScript, PHP
- **Systems Programming:** Process Control, Memory Management, IPC, Signals, Multithreading, Synchronization(Mutexes)
- **Tools:** Git, Linux, Makefile
- **Operating Systems:** Linux/Unix, System Calls, Shell Behavior
- **Backend Development:** Database Integration, ASP.NET (.NET), **MVC Architecture**
- **Software Engineering:** OOP, Modular Design, Algorithm Optimization
- **Web Technologies:** HTML, CSS
- **Data & Analytics:** Power BI, Excel (Pivot Tables), Data Visualization.

Soft Skills

- Attention to Detail
- Problem Solving
- Analytical Thinking
- Teamwork
- Communication Skills
- Time Management
- Adaptability
- Thrives under Pressure
- Self and Continuous Learning
- Conflict Resolution

PROJECTS

Minishell – 42 Amman

February 2026

- Developed a custom Unix shell in C replicating core Bash functionality, including command parsing, pipelines, I/O redirection, built-in commands, and environment variable handling.
- Demonstrated expertise in **process lifecycle management** using `fork()`, `execve()`, and `waitpid()`, ensuring precise execution control.
- Managed file descriptors and inter-process communication to support robust Unix-style piping and signal handling.
- Implemented modular architecture with disciplined memory management, improving code reliability and maintainability.

- Strengthened **low-level systems programming and debugging skills**, reflecting ability to analyze complex technical workflows—transferable to IT auditing and technology transformation projects.

Philosophers – 42 Amman

March 2026

- Implemented the Dining Philosophers problem in C to model concurrent resource sharing and synchronization.
- Designed a thread-based solution using mutexes to prevent race conditions and ensure safe fork access.
- Managed thread lifecycle and timing constraints to avoid deadlocks and starvation scenarios.
- Applied precise control over shared memory and synchronization primitives, reinforcing understanding of concurrency patterns.
- Strengthened debugging skills in multi-threaded environments, focusing on timing issues and data consistency.

Employee Management Platform - JODDB Hackathon (JODDB)

October 2025

- Developed a **full-stack employee management** system with structured data management and role-based access controls.
- Built a modern web interface using React and TypeScript, integrated with a secure backend and RESTful APIs.
- Delivered under tight deadlines, demonstrating rapid system design, teamwork, and practical business-oriented solutions.
- Strengthened skills in **system integration, data handling, and collaborative project execution**, relevant to IT auditing and digital transformation.

EDUCATION

Bachelor of Software Engineering - Jordan University of Science and Technology

2023 - Present | CGPA: 3.45

LANGUAGES

Arabic – Fluent (Written & Spoken)

English – Excellent (Written & Spoken)

PROFESSIONAL CERTIFICATES

Systems & Linux (Red Hat) :

- Red Hat System Administration I (RH124) – 40 Hours 2026
- Red Hat System Administration II (RH134) – 40 Hours 2026
- Red Hat Linux Fundamentals (RH104) – 16 Hours 2026

AI & Cybersecurity (Cisco) :

- Apply AI: Update Your Resume – Cisco 2026
- Introduction to Modern AI – Cisco 2026
- Introduction to Cybersecurity – Cisco 2026
- Digital Awareness – Cisco 2026
- Industrial Cybersecurity Essentials – Cisco 2026
- Junior Cybersecurity Analyst Career Path – Cisco 2026

Technology & Competitions :

- Kubicle Digital Heroes Programme (Intermediate) – PwC CSR Digital Heroes 2026
- CCNA: Introduction to Networks – Cisco 2025
- Introduction to Data Science – Cisco 2026
- JU Programming Contest – JU 2026
- JODDB Hackathon for Amman 42 Students – JODDB 2025
- Piscine Level – 42 Amman 2025
- JUST Problem Solving for Beginners – JUST 2024
